- Magnetic mount version wind speed certified to 180km/h
- Latest slimline LED technology
- Option for front or rear illumination only
- Optional integral speaker and siren

R65
Class 2

Magnetic mount
versions wind speed
certified to
**180km/h
(105mph)**

Overview

- Compact LED lightbar with various configuration options including:
 - Two or four corner LED modules, giving either front or rear, or full 360 degree coverage or 2 x 360 degree 9-3751 LED modules
 - Option of addition of one or two inner LED modules to the front and rear for additional warning capability. If a single inner module is added, it can be split to provide 'half and half' flashing operation, allowing symmetrical, side-to-side flashing
 - Choice of LED scene/takedown lights which can be set for flashing mode for extra visibility, or to steady operation for scene illumination
 - Despite its compact size, can also be fitted with an integral siren and speaker, which when combined with 4 x LED corner modules, provides an all-inclusive solution
 - Choice of flash controllers allowing functions such as front/rear switching to be included if required

Materials

- Lens and base: strong UV stabilised polycarbonate
- Clear lens as standard. Coloured lens available on request

Mounting

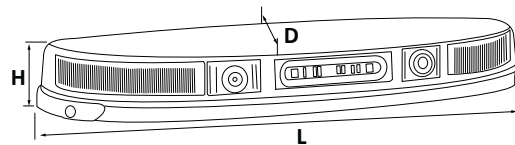

- Permanent or magnetic
- Magnetic mount versions - wind speed certified to 180km/h (105mph). Supplied with 3 metre straight lead, switched plug and 4 x 40 kg magnets with heavy duty, moulded rubber covers to preserve vehicle paintwork. Accessories include: optional quick release safety strap; heavy duty carry case

R65 approvals
